EDUCATION

Kean University, Union, NJ **Expected May 2027**

Bachelor of Science, Information Technology | GPA: 3.2
Relevant coursework: Network Technology, Computer Systems, IT Project Management, Augmented Reality, Human-Computer Interaction.

RELEVANT EXPERIENCE

Game Room Attendant | Miron Student Center, Kean University **May 2023 - Present**

- Provide technical and customer support in a busy campus space; diagnose malfunctioning game machines and help restore service.
- Coordinate with coworkers while managing daily operations and visitor requests.

Self-Checkout Clerk | ShopRite, Union, NJ **Sep 2022 - 2023**

- Diagnosed self-checkout scanner and transaction issues, escalating equipment faults when needed.
- Assisted customers across multiple stations while maintaining accuracy and service flow.

PROJECTS

E-Sports Lab Network and Server Plan

- Owned the network/server workstream in a five-person academic plan for 50 users; specified IP/VLAN design, server roles, security, testing, and handover tasks.

AR Retail Product Placement App

- Built a Unity/C# Android AR app with a four-product gallery, plane detection, touch placement, and product-specific controls; packaged an APK.

Pulse Runner

- Built a playable three-level HTML/CSS/JavaScript maze game with keyboard/touch input, timed hazards, pause, audio, and a locally saved best score.

AI-Integrated Web Lab

- Built a local prototype using TensorFlow.js and a Node.js API for image classification, four-model image description comparison, and PDF resume review.

Android Counter Apps

- Wrote and compiled Java/Android counter apps using MVC, increment/decrement/reset controls, and saved-state restoration; checked model behavior.

ACME Directory and Licensing Design

- Mapped a fictional company's users and equipment into Active Directory OUs and compared licensing costs for 1,000 users at 60% concurrent use.

E-Commerce Usability Study

- Contributed to a five-person, task-based study of three shoppers; summarized mobile and desktop navigation friction to guide an interface concept.

Habit Hive Web Application

- Built a multipage HTML/CSS/JavaScript site; structured its navigation and fixed layout, link, and image-loading issues.

SKILLS

Support and systems: Customer support, PC diagnostics, equipment troubleshooting, issue escalation; Windows, Linux, macOS.
Networking: IP addressing, VLAN/DHCP/DNS concepts, directory structure, server-role planning.
Development: HTML, CSS, JavaScript, Node.js, Python, C#, Unity, AR Foundation, TensorFlow.js.
